

A BRAND NEW DYNAMIC IN SAND SEPARATION TECHNOLOGY

ARRIVES IN THE MIDDLE EAST REGION

The **BBS™ Sand Separator System** is uniquely designed to capture the maximum sand and solids recovery during well production operations, and during flow back and long term well testing operations, with up to **99.5%** solids recovery consistently delivered in past operational installations.

PROVEN BENEFITS:

- ✓ Replaces both the traditional Cyclonic Separator and Dual Pot Sand Filter packages.
- ✓ Removes the need for high-pressure water flush pumps and related water supply.
- ✓ Reduces the need for sacrificial choke manifold applications.
- ✓ Replaces the plug catcher.
- ✓ Reduces the need for multiple spreads in low Well Flow Rate scenarios.
- ✓ Reduces crew size.
